Looking Towards the Future of Aesthetic Science

IMCAS World Congress 2023 welcomes you to this extraordinary 24th edition, leading the advancement of dermatology, plastic surgery, and aging science.

Amidst an era of innovation and rapidly evolving medical science, the expansion of medical and surgical aesthetics requires modern training that is scientifically credible, medically- based, and responsive to modern patient needs. This edition of IMCAS World Congress works to revolutionize medical specialty education with a curative emphasis on the implementation of new technology, safe methods of practice, and scientific transparency.

This year’s scientific program mirrors these objectives, exploring a wide range of topics and new formats among the 15 key themes. We anticipate an expansive course program that awaits you over the next 3 days, including all the latest methods and techniques to modernize your practice.

The distinct Live Anatomy on Cadaver Workshop combines live injection procedure with cadaver dissection for a complete and comprehensive look at injection techniques. We also continue to explore the application of ultrasonography with injection for an in-depth look on how to avoid complications.

Likewise, the IMCAS Surgery Course brings a rare look into the latest surgical procedures from around the world, presented

alongside cadaver dissections. This year’s format will feature the anatomical dissections by the surgeons themselves, so you can truly understand and implement procedures through the mind of an expert.

The surrounding program continues to explore all the relevant subjects that are present in today’s practice. Our clinical dermatology module is larger than ever, examining the full pathological scope of the skin—from diagnosis to treatment—while sessions on injectables and toxins continue to explore a wide selection of courses in filler for the face & body, as well as complications, future, and off-label uses. Full-day modules on practice management, hair restoration, female genital treatments, and cosmeceuticals, are further dedicated to bringing the latest cutting-edge research to innovate and inspire the future of your work.

To complement, the bustling exhibition hall welcomes a global network of more than 300 industry leaders to exhibit their technologies, devices, and new products reshaping the aesthetic market in the coming year.

We are proud to present this 24th edition, of high-quality sessions and medical content, providing you with the best specialty education for your field. #Jointhefuture, as we embrace the rising work of dermatology and plastic surgery and begin the year looking ahead.

THE IMCAS IMPACT

We anticipate the developments of today's practice and work to curate a scientific program that addresses aesthetic innovation without sacrificing the high quality required in specialty medical education. Therefore, each program module embodies fundamental learning objectives that remain intuitive to the current and future practice of medical aesthetics.

EDUCATION

Connect, compare, and learn the latest science and ground-breaking techniques from international experts and the qualitative IMCAS Scientific Board.

SAFETY

Learn verified, preventative methods that consider treatment risks and complication management for both existing and new clinical treatments.

TECHNOLOGY

Discover the new applications of medical technology and explore the future of treatments including robotics, AI, and the innovative work of industry startups.

ETHICS

Navigate the ethics of aesthetic treatment, the complexities of bedside manner, and where to draw the line in treatment to maintain patient well-being and satisfaction.

AT IMCAS WORLD CONGRESS 2023
JANUARY 26 TO 28 • PARIS

NextGen DERMATOLOGY
SATURDAY, 28 JANUARY 2023

Time passes, and despite the constantly improving medical and surgical techniques for anti-aging, it is still necessary to think about the future of our profession and the training of the next generation.

The NextGen Dermatology module has been designed for this: to expand both the future education and practicing network of young dermatologists. Many of them are interested in interventional and aesthetic dermatology, and the training—although excellent in university hospitals—can be inconsistent and often lacking in these fields.

Through this module, we offer a solution by providing an opportunity for young physicians to learn from prestigious international speakers and experts in the fields of clinical, surgical, and aesthetic dermatology. With the inclusion of the cosmetic specialty, the event also embraces the interconnected practice of clinical and cosmetic work, exploring the bridge within all practical areas of the dermatological field.

We also seek to foster the work and recognition of upcoming generations through the establishment of the NextGen Dermatology Award. The event will host a selection of the best abstracts and current work of resident dermatologists to an international jury and medical audience. The top presentations will be awarded for their outstanding work and contributions to their field.

So join us, and don't hesitate to submit your abstracts! We look forward to seeing and celebrating our resident dermatologists at this unique session created for you.

Michael Benzaguen *Muhammad Habib*

ROOM 242 • SATURDAY

NextGen SURGERY

AT IMCAS WORLD CONGRESS 2023
JANUARY 26 TO 28 • PARIS

SATURDAY, 28 JANUARY 2023

The future is in your own hands!

We know how much the pandemic has made it difficult, almost impossible, for the next generation of surgeons to receive proper medical and surgical training. Through the NextGen Surgery module, we are happy to offer a solution by providing an opportunity for young physicians to learn from top international speakers and experts in the fields of surgery.

We also seek to foster the work and recognition of upcoming generations through the establishment of the NextGen Surgery Awards. The event will host a selection of the best abstracts and current work of resident surgeons to an international jury and medical audience.

ANATOMY & AESTHETIC TREATMENT CLASS

Focus on simulator injections & ultrasonography

24-25 JANUARY 2023

HYATT REGENCY PARIS ETOILE

Seats are limited!

REGISTER ON [THINKIN.FR](#)

online only: **1,000 USD***
on-site lectures only: **1,700 USD***
on-site lectures & hands-on: **3,200 USD***

*Early bird prices until December 23, after which 10% increase

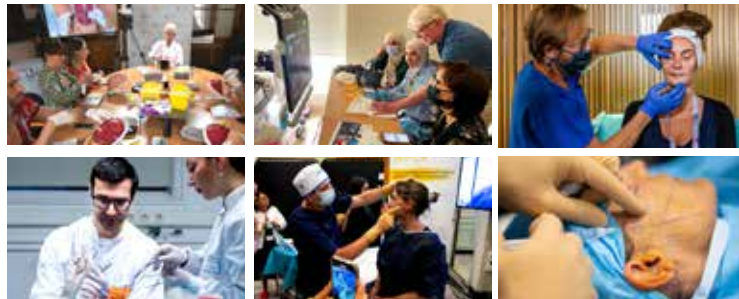

A two-day VIP training just before IMCAS World Congress 2023!

Discover the disruptive hands-on formats of the THINKIN Class in Paris driven by Dr Benjamin ASCHER and his amazing faculty of dedicated experts.

This training class is designed to help you **improve your anatomical knowledge & treatment skills for HA, toxins, and threads** to deliver safe and satisfying results to your patients. And it's open to all levels of practitioners!

Led by a team of world-renowned physicians, this intimate yet high-end class presents rotating workstations that go through **dissections, LIVE demonstrations, HANDS-ON simulator injections, and HANDS-ON ultrasonography**.

You can discover the **3D injection simulator** used with the F.A.S.T. (Facial Aesthetic Simulator Training) Method, which offers a close to real-life injection experience that replicates the anatomical layers and textures down to the detail.

Organised in collaboration with
CUTANEOUS - COTOFANA ANATOMY

With unrestricted educational grants from
