Promotion of the EADV Spring Symposium 2024

Distinguished Presidents,
Dear Colleagues,

The EADV Leadership, Committees and Office are intensively working on the upcoming **EADV Spring Symposium 2024, Deep Knowing to Keep Growing**. This year, the EADV Symposium will take place on the beautiful island of Malta.

The 3-day programme will offer clinically focussed updates and breaking news in the field of dermatology and venereology. With over 25 educational sessions featuring more than 100 renowned speakers, the symposium is structured into three distinct tracks to cater to specific interests and expectations of both young dermatologists-venereologists and experienced professionals. These range from recent advancements in pruritus and prurigo, paediatric dermatology, marine and aquatic dermatology, imaging techniques, climate and migrant dermatology and more.

We would greatly appreciate your support and endorsement in promoting the Spring Symposium among your members and through your website, networks, and social media channels. A set of materials has been created for your use and is available [here](#).

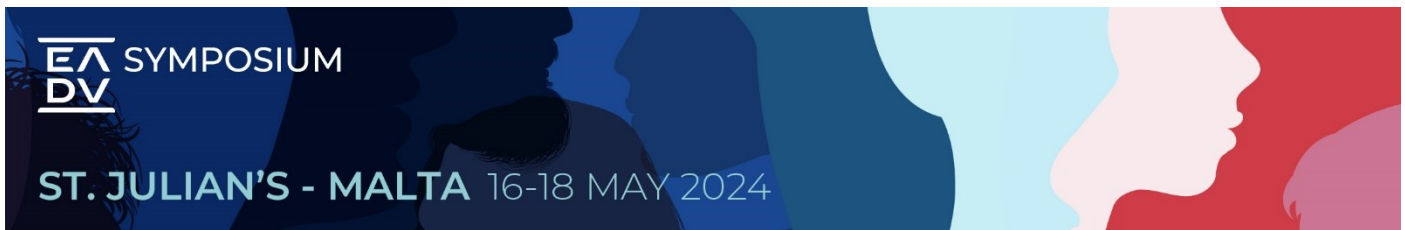

Thank you for your continued cooperation and support whilst extending a warm invitation to you and your society's members to join us at the Symposium in Malta.

Sincerely,

Prof Martin Röcken
EADV President

Prof Carmen Salavastru
EADV Secretary General
