WORLD SKIN HEALTH DAY 2022

Date: 19-23 January 2022
Location: UGANC & KASSA

**Hosted by International League of
Dermatological Societies & International Society
of Dermatology**

WELCOME

World Skin Health Day is a joint project of the International League of Dermatological Societies (ILDS) and the International Society of Dermatology (ISD). Since 2013, World Skin Health Day has been taking place across the world to raise awareness of and treat a diverse range of skin conditions.

Skin disease is one of the most common human illnesses. According to the World Health Organization, over 900 million people are affected by skin diseases around the world at any time. Also, the WHO International Classification of Diseases 11th Revision (ICD-11) includes more than 2,000 skin or skin-related illnesses.

Taking part in World Skin Health Day helps to raise awareness about the wide-ranging impact of skin disease, as well as supporting people needing treatment in their local communities.

The aim of World Skin Health Day is to recognize and promote skin health around the world.
